RFP Parking and Revenue Control System Q&A

Questions:

- Q1. Do all garage levels have a card reader interface to access the Kiel Garage elevator?
- a. If not, which levels require a card reader?
 - b. How many locations in total?

Answer:

No. Currently each level of the Kiel Garage does not require an interface reader that would allow you access to the elevator. Levels 3, 4, 5, and 6 including the street level (level 2) would require card readers. There are a total of five locations.

- Q2. How many access cards should be quoted in the RFP?

Answer:

Please include two-thousand access cards in your quote for the RFP.

- Q3. Please confirm the network connectivity between the Kiel Garage Office to each of the surface lots is either fiber or TI.

Answer:

Our surface lot (Williams Lot) currently uses AT&T U-Verse. Kiel Garage and City Hall are fiber optic.

- Q4. Please confirm that loops can be reused if in good condition.

Answer:

Yes. Loops can be reused, however please include pricing of installation per loop if needed.
